

AMRAAM 2

The AMRAAM-2 is designed specifically for flyers that want the great flights and military styling of the AMRAAM, but for smaller flying fields, smaller motors, or smaller budgets. It's great for your first bigger bird, introducing a youngster or B.A.R. to higher-power rocketry, or when you want to wow `em with those great F and G motor flights on a smaller flying field. Priced right for your budget, but with PML design, quality, and standard features built-in! Flies great with 29mm F, G, and H motors.

Features Include:

- Scale kit
- Pre-slotted Quantum Tube airframe
- G-10 fiberglass fins
- Piston ejection system
- Multi-panel nylon parachute
- Plastic nosecone
- Thin-wall brass launch lug
- Detailed decal sheet
- Explicit instruction

Dia.: 2.1" Height: 42" Weight: 24 oz. MMT: 1-29mm Chute size: 24" Launch lug: 1/4"

Recommended motors and predicted altitude chart

All motors shown are Aerotech. Information displayed as Altitude in Feet, Optimal Delay in Seconds

Single Use Motor	F20W	F23BM	F25W	F50T	G38BM	G40W	G80T	H55W

Shaded cell means this motor/rocket combination requires absolutely top-notch construction to fly successfully.

Other motors can also be used but some may require modifications to the kit.

Always refer to the Motor Recommendations Chart at www.publicmissiles.com for the latest information.
